If you think you might be pregnant, please inform the technologist.

Patient Instructions

Ultrasound

Abdominal Ultrasound

Morning appointment: Do not eat or drink anything after 10pm on the evening before your test. If you require heart medications, you should take these as per your normal routine.

Afternoon appointment: Do not eat or drink anything after 8am on the day of your test. If you require heart medications, you should take these as per your normal routine.

Pelvic Ultrasound

Drink five (5) glasses of water (8 ounces each) before your test. You should be finished drinking this by one hour before your appointment time. Do not void after drinking this water as your bladder must be full. Unless contraindicated, an ultrasound probe may be inserted internally.

Obstetrical Ultrasound

Before 20 weeks (4 ½ months): Follow the instructions for pelvic ultrasound above.

After 20 weeks (4 ½ months): No preparation is required.

Other ultrasound tests: No preparation is required

Gastrics

Upper GI series: Do not eat or drink anything including oral medications after 10pm on the night before your appointment. Take any bedtime medications before 10pm. Bring your morning medications to the hospital and take them after your test. Do not smoke or chew gum the morning of your test.

Small Bowel Follow-Through: Do not eat or drink anything after 10pm the night before your appointment. If you require heart medications, you should take these as per your normal routine. Expect to be in the department at least 2-3 hours.

Bone Mineral Densitometry (BMD)

No preparation required
